SAFE STORAGE
RELIABLE PERFORMANCE.
BUILT TO LAST.

ABOUT US

We are a leading EPC company specializing in the design, manufacturing, supply, installation & commissioning of high-quality LPG storage vessels & associated facilities.

With extensive experience in engineering, procurement, manufacturing & project execution, we deliver high-quality solutions that meet the highest international standards of safety, reliability & performance. Our state-of-the-art fabrication facilities, skilled workforce & rigorous quality control systems enable us to manufacture a comprehensive range of pressure equipment tailored to our clients' specific operational requirements.

With decades of experience, advanced technologies & a commitment to safety, we deliver reliable solutions that meet international standards.

ENGINEERING. PROCUREMENT. CONSTRUCTION.

We offer end-to-end EPC solutions for LPG storage projects tailored to client requirements.

Serving customers across domestic and international markets, we have earned a reputation for delivering reliable products, on-time project execution & exceptional customer support. Our export expertise, engineering capabilities & commitment to continuous improvement make us a preferred partner for EPC contractors, distributors, consultants & end users worldwide.

ENGINEERING

- Process Design
- Mechanical Design
- Structural Design
- Piping & Instrumentation
- 3D Modeling

PROCUREMENT

- Material Sourcing
- Equipment Supply
- Vendor Management
- Quality Assurance
- Logistics

CONSTRUCTION

- Civil Works
- Erection
- Piping & Electrical
- Insulation & Painting
- Safety Systems

COMMISSIONING

- Pre-Commissioning
- Testing
- Commissioning
- Training
- Hand Over

LPG STORAGE VESSELS

Horizontal LPG storage vessels

Horizontal LPG storage vessels are designed for the safe and efficient storage of liquefied petroleum gas under pressure. These vessels are widely used in LPG terminals, bottling plants, industrial facilities, commercial installations & distribution centers.

- ▶ Capacities: 10 m³ to 200 m³
- ▶ Design Pressure: Up to 17.5 bar
- ▶ Design Standard: ASME Section VIII Div.1
- ▶ Material: SA-516 Gr.70 / SA-537 CL2
- ▶ Application: Above Ground Storage
- ▶ Orientation: Horizontal
- ▶ Finishing: Shot Blasting, Primer & Paint
- ▶ Accessories: Manholes, Valves, Gauges, Safety Devices, Level Indicators, etc.

Vertical LPG Storage Vessels

Vertical LPG storage vessels provide an efficient storage solution where installation space is limited while maintaining high storage capacity & operational safety. Engineered for above-ground installation, these vessels are manufactured with precision to withstand operating pressures & environmental conditions. Their compact footprint makes them ideal for commercial, industrial & utility applications requiring reliable LPG storage.

- ▶ Capacities: 5 m³ to 150 m³
- ▶ Design Pressure: Up to 17.5 bar
- ▶ Design Standard: ASME Section VIII Div.1
- ▶ Material: SA-516 Gr.70 / SA-537 CL2
- ▶ Application: Above Ground Storage
- ▶ Orientation: Vertical
- ▶ Finishing: Shot Blasting, Primer & Paint
- ▶ Accessories: Nozzles, Valves, Gauges, Safety Devices, Level Indicators, etc.

QUALITY & SAFETY

- ✓ ISO 9001:2015 Certified
- ✓ ASME Section VIII Div. 1 Compliant
- ✓ PED Compliant
- ✓ Welders & Procedures Qualified
- ✓ 100% Radiography / UT Testing

"We build every vessel with precision, passion and a promise of safety."

- ✓ Hydrostatic Testing
- ✓ Heat Treatment Furnace(if required)
- ✓ Strict Quality Control at Every Stage
- ✓ Focus on ZERO Harm Environment

Optional Equipment

- ✓ Remote Level Transmitter
- ✓ Radar Level Gauge
- ✓ Load Cell System
- ✓ Fire Protection System
- ✓ Water Spray Ring
- ✓ Cathodic Protection
- ✓ Sun Shield
- ✓ PLC Monitoring

OUR CAPABILITIES

- ▶ Advanced Manufacturing Facilities
- ▶ Skilled & Certified Workforce
- ▶ Modern Machinery & Equipment
- ▶ In-house Testing & Inspection
- ▶ Timely Delivery & Global Standards
